

Arwadh has developed supply chain strategies and distribution channels that support Saudi Government organizations and the U.S. Department of Defense agencies. Procurement teams located in Kuwait City and Riyadh, Saudi Arabia extend our supply chain capabilities to virtually any location in the GCC. Our scalable IT systems provide visibility, interaction, accuracy and efficiency throughout the transaction process, ensuring the exact products are delivered at the right time.

SupplyCore Middle East

Providing essential materials in support of military operations present challenges not commonly associated with the commercial sector. Arwadh has proven the ability to meet and exceed these challenges. We have been a major vendor and subcontractor to the U.S. Department of Defense through the CENTCOM Prime Vendor program since 2004. Since 2006 our warehouse management strategies have been used in the operation of the IBA warehouse at Camp LSA Ali Al Salem Air Base, Kuwait.

Warehouse Management

Does a new project have you looking for additional warehouse space? Need to improve the efficiency of your facility operations? Looking to hire additional warehouse staff? Arwadh has the contingency skills and capabilities to provide facility management and maintenance services to optimize your facility operations. Arwadh warehouse facilities encompass over 10,000 m² which receive in-bound materials into inventory, perform quality inspections, process outgoing orders, containerize or package as needed and deliver shipments. Facilities maintenance and management services include labor, materials, tools and transportation equipment to efficiently and effectively operate your facility.

Government Supply

Beginning in 2002, Arwadh started providing equipment and service for portable generators to Saudi Government customers. Leveraging this core capability, Arwadh now supports current operations of the Ministry of Interior, Ministry of Defense and Ministry of Water and Electricity. We work together with our agency clients to help them identify problem areas, leverage proprietary technology to create innovative and cost effective solutions built to mission requirements and provide on-going support including service and spare parts to ensure the longevity of our solutions.

Through our collaborative partnerships and skilled engineering team, Arwadh has become a leading provider of force sustaining solutions for Saudi Government agencies.

- Portable Diesel Generators
- Tactical Wheeled Vehicles
- Mobile Medical Units
- Hospital Equipment
