

Contract signing is only the beginning of your relationship with Arwadh. Our 24/7 service department is dedicated to keeping your operations on-line to improve your bottom line. As a result of our strategically placed services network, Arwadh can reach any location in the Middle East on short notice to support your operations.

Project Management

Arwadh project management teams integrate the activities of all parties involved to meet client expectations. We work closely with all stakeholders during every step of a project, enabling your staff to concentrate on your business. We can perform as a project manager responsible for executing a single project or as a program manager overseeing complex programs involving multiple projects.

Installations

Arwadh's installation and training teams work with client representatives to ensure your equipment is installed properly, on schedule and can be operated seamlessly by your technicians. Our state of the art technology combined with a commitment to quality workmanship assures clients will receive the maximum operating life of their investment.

Maintenance

Proper maintenance of equipment today leads to fewer problems tomorrow and maximum equipment lifecycle.

Detailed maintenance schedules, manuals and parts lists are included with each Arwadh installation. Our service engineers can offer and develop an ongoing service plan to further support your operation. Additionally, most of our equipment can be programmed with remote diagnostic and reporting capability to ensure continuous capture of production data.

Spare Parts

Arwadh recognizes the value of having the right parts available when you need them. Our comprehensive spare parts inventory is maintained at our central warehouse in Riyadh. As a result our clients have a tremendous competitive advantage with parts available the same day, or overnight in many cases.
